

LIFTWINCH

HIGH SPEED WINCH SYSTEM
UP TO 160 M LENGTH OF ROPE
HIGH ACCELERATION

Liftwinch is a new kind of winch system featuring an amazing acceleration force and an impressive speed.

With a breathtaking speed of 8,5 m/sec spectacular vertical camera moves can be realized with a completely steady and smooth picture as the 5-axis gyro-stabilized Stab C Compact remotehead complements the versatile system.

On the rope, stop marks can be set in order to define a minimal or maximal distance the system has to climb or descend.

No matter if in studios with high ceilings or outdoor, the Liftwinch system is vertically displaceable from the floor up to the (lighting) rig or even beyond up to the deviating point. The set-up of the system is quick and easy and it is BGVC1 safety-certificated for the operation above audience.

TECHNICAL DETAILS

MAX. ROPE LENGTH	160 m
SPEED	8,5 m/s
COMMUNICATION	cable or wireless
PAYLOAD	100 kg
REMOTEHEAD	Stab C Compact
SAFETY CERTIFICATE	BGV C1
